PROFILE

A motivated professional with expertise in **Dart**, **Java**, and **Flutter**. Proficient in building scalable applications using **MVC (Model-View-Controller)** architecture and **GetX** state management. Currently expanding technical depth by learning the **Provider** pattern. Experienced in **REST API** integration and **WebSocket** communication, with a focus on clean, modular code and creative problem-solving.

PROFESSIONAL EXPERIENCE

Trainee Flutter Developer | Sparktech IT Limited Dhaka, Bangladesh | December 2025 – Present

- **Developing** cross-platform mobile applications using **MVC architecture** to separate business logic from UI components.
 - **Collaborating** with the specialized AI team "MindMatrix" to develop "Aura," an innovative AI-driven mental health support application.
 - **Managing** complex application states using **GetX**, ensuring high performance and reactive user interfaces.
- Integrating** real-time communication via **WebSockets** and secure payment gateways like **Stripe API**.

Industrial Attachment | BDCalling IT | 3 Months Experience

PROJECTS

Home Tutor & Learning Integration App | Flutter, GetX, REST API, WebSockets

- **Engineered** a multi-role platform (Student, Teacher, Admin) with full **REST API integration** for complex business logic.
- **Developed** a secure workflow where teacher-created classes require **Admin Approval** before becoming visible to students.
- **Integrated Geolocation (Lat/Long)** to facilitate location-based tutor discovery and show nearby classes to students.
- **Utilized GetX** for the entire project's reactive state management, dependency injection, and routing.

Aura (AI Emotional Support App) |

- **Designing** a responsive UI where users can express their feelings through text to receive personalized support.
- **Implementing** the **MVC pattern** to manage AI-driven data models and real-time UI updates independently.
- **Developing** features to analyze user moods and provide motivational music and content recommendations based on emotional states.

Task Management System | Flutter & REST API

- **Built** a productivity app with full **CRUD functionality**, allowing users to **Add** and **Delete** tasks dynamically.
- **Applied** a modular structure to ensure the codebase is easy to debug, scale, and maintain.

BMI Calculator App | Flutter & Dart

- **Developed** a mobile application using Flutter and Dart to calculate Body Mass Index (BMI).
- **Implemented** input validation and categorized results (Underweight, Normal, Obese) for accurate health tracking. +1
- **Designed** a clean and user-friendly interface ensuring smooth navigation.

SKILLS

Mobile Development:(Flutter, Dart)
Architecture: MVC (Model-View-Controller)
Backend/APIs: REST API Integration
Design: UI/UX Design
Tools: Android Studio,GitHub,
Office Productivity: MS Word, Excel, PowerPoint, Access.

SOFT SKILLS

Effective Communication, Team Collaboration , Problem Solving

EDUCATION

- Diploma in Engineering | Lakshmi pur Polytechnic Institute | 2022 – Running
- Industrial Attachment | BD Calling | September 2025-december 2025
- S.S.C | Moyura High School | 2016 – 2021

CERTIFICATES

Flutter Development Course |
BD Calling.

Computer Office Certification
(Anticipated) | Hi-Tech IT
Institute.
